Subject: water use on SRC property

Hi Ken,

I wanted to bring you up to speed on some field activity at the SRC property. EPA has requested to use approximately 1,500 gallons/day from the SRC hydrants/water tower system. Brooks discussed this with James, who then talked with Mr. Hothi. Both James and Mr. Hothi have agreed to allow EPA to use the water, as requested, and have stated that the requested water use is well within the capacity of the existing system. EPA understands SRC does not have a permit from DOH to use the water. However, since this is part of a CERCLA removal action, EPA believes the permit exemption in 40 C.F.R. § 300.400(e)(1) applies to this on-site activity. If there are any water use rights limitations for the aquifer that are of concern to SRC, please let me know so that we can find a workable solution.

Thanks,
Kris
